

The AARP® Homeowners Insurance Program from The Hartford offers homeowners, condo, and renters insurance quotes to AARP members. To receive a quote, members must complete the attached "Request for Quote" form and return it to The Hartford. The program is underwritten by various Hartford affiliates depending on the state, and eligibility typically requires AARP membership. The Hartford does not provide new home insurance in all areas, including California and Florida, and the program is unavailable in Canada and U.S. territories. The quote process requires detailed information about the applicant, including personal details, residence information, loss history, and property specifics. Notably, mobile home coverage is not available through this program, and homeowners insurance does not cover flood losses. The program emphasizes the importance of providing accurate information for the most precise quote. Additionally, consumer reports related to credit and loss history may be ordered as part of the underwriting process, and applicants in Vermont must authorize this report to receive a quote.
